

About

Swivt Lab

Swivt Technologies was founded in 2016 by Subash Shahi who have decade of experience on hand who always had new and creative idea in the industry.

With the connection with passionate talents in Hongkong where IT industry is flourishing and new talents are approaching to find the better careers we are leading team serving major business hub around globe.

We are helping community and youth by educating and giving them onsite trainings which helps them to figure out the actual strength and imply their talent at work. Surrounded by young, dynamic and happy team Swivt is always moving forward in positive path and we want to expand our wings for the awesome future.

The list of our Professional Skills

We are extremely enthusiastic about the new technologies .

Cool developments are taking place under the Collaboration at a global level, transparency, and development opportunities regardless of where you were born: these are the things that we get out of bed for every day.

International entrepreneurship and teamwork are the things that drive us.

We consider political and geographical boundaries to be insignificant.

HOW IT WORKS?

Vision & Strategy

We translate your new media based business model into a clear vision that reflects the manner in which your strategic goals can be achieved using new media.

Planning

We contribute to the online strategy, design a concrete plan for the realization of this strategy, and determine the specifications of the required new media

Execution

After performing a thorough analysis, we tell you exactly which new media tool or combination will ensure the most efficient, most effective, and most likely realization of your business model.

Customer Support

We provide 24/7 customer support so that we could maintain communication while undergoing all those process to give result oriented output .
